Systech Advisor[®] SPT Training

- ✚ Learn proven methods and best practices for Systech’s Serialized Product Tracking application
- ✚ Apply your skills to real world instructional design use cases
- ✚ Available for delivery to groups up to 10

Course description

This 2-day course gives participants an introduction to Systech Advisor SPT (Serialized Product Tracking) application. Participants will gain an understanding of Item Process Streams, configuration properties and performance statistics. Also discussed is the process for how Manual Pallet Building is managed. Participants will learn how to setup products, and gain a good understanding of number support.

Who should attend?

Systech Advisor SPT training class is for anyone who participates in the operation, maintenance and configuration of the Line Management system with serialization responsibilities. Attendees typically include:

- ✚ Operators charged with managing and executing the SPT systems during production.
- ✚ Mechanics or Technicians responsible for production system maintenance, and maintaining configurations.
- ✚ Engineers responsible for making configurations changes during the life of the system.

Prerequisite

None

Course Outline

The Course outline is provided to illustrate subject material covered during the two (2) day course. Material may be covered on days other than as detailed.

Day 1	Day 2	
EPCIS	SPT Engine	Guardian Product Setup
Advisor Communications	Starting a Lot	Advisor Product Setup
SPT Number Support	Ending a Lot	Understand the SPT Workflow
EPC Global	Process Properties	Building SPT Streams
Item Process Stream	Global Properties	Troubleshooting SPT Streams
How SPT Works	Stream Properties	RFID Technology Overview
SPT Engine GUI	Builder Screen	Pallet Building/Rework
SPT Processes	Alias Identifiers	SPT Reports
SPT Streams	Counters and Tags	Questions and Answers
SPT Commissioning Concept		
SPT Error Troubleshooting		
Sample SPT Project Review

What you'll receive

All participants receive the following:

- ✚ 2 days of intensive hands-on instruction by a Systech trainer.
- ✚ Training Reference Guide detailing all concepts and techniques taught
- ✚ All job aids and worksheets used during training
- ✚ Proficiency test out examination is available

Delivery Options

Option # 1	At Systech Classroom Training
<input checked="" type="checkbox"/>	2 days of hands on training delivered at Systech by a Systech trainer.
<input checked="" type="checkbox"/>	Class size: 3 to 10 recommended
<input checked="" type="checkbox"/>	Fee Includes all instructions and course materials
<input checked="" type="checkbox"/>	Proficiency testing with immediate feedback is available for a fee.
<input checked="" type="checkbox"/>	Ideal for developing a standardized approach to SPT line processes and a consistent methodology for production line personnel
Option # 2	On-Site Classroom Training
<input checked="" type="checkbox"/>	2 days of hands on training delivered at the customer's facility by a Systech trainer.
<input checked="" type="checkbox"/>	Class size: 3 to 10 recommended
<input checked="" type="checkbox"/>	Fee Includes all instructions and course materials
<input checked="" type="checkbox"/>	Onsite Course requires access to a customer provided dedicated production or development environment configured with a Guardian Server networked to Advisor systems.
<input checked="" type="checkbox"/>	Proficiency testing online with immediate feedback is available for a fee.
<input checked="" type="checkbox"/>	Ideal for developing a standardized approach to production line processes and a consistent methodology for production line personnel
