Systech Guardian® SPT Training

- ✚ Learn proven methods and best practices for Systech’s Serialized Product Tracking application
- ✚ Learn to understand Systech Guardian® and Systech Advisor® Communications
- ✚ Apply your skills to real world instructional design use cases
- ✚ Available for delivery to groups up to 10

Course description

This 2-day course gives participants an introduction to Systech Guardian SPT (Serialized Product Tracking) application. Participants will gain an understanding of Guardian to Advisor communication, and process streams. This 2-day course is designed to provide Information Technology professionals, and network personnel responsible for network communication with an understanding of Systech Guardian SPT application. The course also covers provisioning serialization numbers, commissioning and decommissioning events, and threshold properties.

Who should attend?

The Guardian SPT training class is for anyone who participates in the operation, maintenance and configuration of the Site Level Serialization Management software. Attendees typically include:

- ✚ Administrators and IT personnel charged with managing and maintaining network configurations.
- ✚ IT and Engineers responsible for making configurations changes during the life of the system.

Prerequisite

Systech Advisor® SPT Training

Course Outline

The Course outline is provided to illustrate subject material covered during the two (2) day course. Material may be covered on days other than as detailed.

Day 1	Day 2	
Serialized Product Tracking	Guardian Server	Advisor Configuration
SPT Concept	Guardian Configuration	DNS Name Suffix
Industry Challenge	Commissioning	Troubleshooting
Packaging Execution System	Decommissioning	Poor Communication
Alias Identifiers	Notification Events	Database Protection
Guardian SPT Communication	Guardian to EPCIS	Threshold Settings
How SPT Works	Provisioning	Object Types
	Guardian Advisor Setup

What you'll receive

All participants receive the following:

- ✦ 2 days of intensive hands-on instruction by a Systech trainer.
- ✦ Training Reference Guide detailing all concepts and techniques taught
- ✦ All job aids and worksheets used during training
- ✦ Proficiency test out examination is available

Delivery Options

Option # 1	At Systech Classroom Training
<input checked="" type="checkbox"/>	2 days of hands on training delivered at Systech by a Systech trainer.
<input checked="" type="checkbox"/>	Class size: 3 to 10 recommended
<input checked="" type="checkbox"/>	Fee Includes all instruction and course materials
<input checked="" type="checkbox"/>	Proficiency testing with immediate feedback is available for a fee.
<input checked="" type="checkbox"/>	Ideal for developing a standardized approach to SPT line processes and a consistent methodology for production line personnel

Option # 2	On-Site Classroom Training
<input checked="" type="checkbox"/>	2 days of hands on training delivered at the customer's facility by a Systech trainer.
<input checked="" type="checkbox"/>	Class size: 3 to 10 recommended
<input checked="" type="checkbox"/>	Fee Includes all instruction and course materials
<input checked="" type="checkbox"/>	Onsite Course requires access to a customer provided dedicated production or development environment configured with a Guardian Server networked to Advisor systems.
<input checked="" type="checkbox"/>	Proficiency testing online with immediate feedback is available for a fee.
<input checked="" type="checkbox"/>	Ideal for developing a standardized approach to production line processes and a consistent methodology for production line personnel
