SYSTECH International Celebrates Twenty Years of Delivering Packaging Performance Management Solutions to Manufacturers

SYSTECH Solutions Enhance Enterprise-Wide Decision Making Capabilities

Cranbury, New Jersey, May 23, 2005 – SYSTECH International, the leading provider of Packaging Performance Management Solutions, today celebrates twenty years delivering best-in-class solutions to highly regulated manufacturing industries.

Increasingly, organizations are placing machine vision inspection and packaging line automation tools into the hands of more people across the enterprise, empowering each individual to serve as a decision-maker on a daily basis. This trend has fueled the demand for more sophisticated scalable solutions that deliver superior performance to users enterprise-wide.

“As we close our second decade, we see strong interest in our packaging performance management solutions,” says SYSTECH’s CEO Robert DeJean. “Organizations recognize the value of our applications in delivering superior results and simplifying the user experience, while working under more stringent compliance requirements. SYSTECH International has achieved success in the market because we enable our customers to focus and capitalize on operational activities that deliver direct results to their bottom line. As we enter our third decade, we will continue to provide the level of support that our customers demand.”

About SYSTECH International

SYSTECH International is the leading provider of Packaging Performance Management Solutions. Founded in 1985, its TIPS® family of solutions was developed specifically to meet the needs of inspection, control, and information management in packaging environments. A recognized market leader in the Pharmaceutical, Medical Device,

Biotechnology, and Healthcare industries, SYSTECH is rapidly gaining market leadership in the Food and Beverage industry. While focused on highly regulated industries, the company also services other packaging and converting industries including Printing, Cosmetics, Consumer Products, Automotive, and Electronics.
