

## **Systech and Wolke Collaborate to Address Critical Requirements of the Pharmaceutical Packaging Industry**

*Industry leaders will offer integrated vision inspection and printing solutions to meet demands of advanced coding and serialization applications*

**Brussels, Belgium May 11, 2009** - Systech International, innovator of Packaging Execution Systems (PES) for the pharmaceutical industry, today announced their partnership with Wolke Inks & Printers. This partnership is intended to address the needs of leading pharmaceutical companies to more tightly integrate processes critical to successful coding and serialization.

Diverse coding requirements and serialization projects are driving pharmaceutical manufacturers to place more distinct data on product packages. As these companies look to replicate coding and serialization deployments across multiple lines and locations around the world, accurate, consistent and high quality marking on individual packages at production speeds becomes increasingly critical to their success. The partnership of Systech, a leading provider of vision inspection and serialization solutions and Wolke Inks and Printers, a recognized leader in maintenance free inkjet printing, is intended to not only address the current requirements of the industry but will also lead to new functionality incorporated into their productized solutions.

“Our customers have told us that printing is critical to their success.” said Robert DeJean, CEO and Founder, Systech International. “The purpose of our collaboration with Wolke Inks and Printers is to increase the performance and value our customers receive from their investments.”

“We are excited to be working with Systech International both at a technical and strategic level,” states Wolfgang Keller, CEO and founder, Wolke Inks & Printers GmbH. “Collaborating with Systech is important to our customers and enables us to continue to meet the needs of the market.”

Systech and Wolke will showcase the integrated solution at Achema 2009, May 11<sup>th</sup> to May 15<sup>th</sup>. Please visit booth Hall 3.1 - Booth F32-F35 to see a demonstration.

### **About Systech International**

Systech International is an innovator of packaging execution systems (PES) for the pharmaceutical industry. Systech offers a suite of productized software that quickly gives manufactures complete control over packaging processes along with the actionable intelligence required to continuously improve performance. Systech implements vision, line management, performance metric and serialization solutions for companies around the world to secure the supply chain and to optimize packing efficiencies. By partnering with Systech, companies can leverage a scaleable, repeatable architecture, to consistently deliver significant improvements at the machine, line and plant levels. ### **About Wolke Inks & Printers**

The company was founded in 1992 by Wolfgang Keller as "Wolke Inkjet Bedarf GmbH". In the meantime, the company - today under the name of Wolke Inks & Printers GmbH - has a staff of 42 in Hersbruck. Wolke is considered worldwide as the leading supplier of maintenance-free coding systems with HP technology and as a specialist for high-quality industrial inks at fair prices. In 2000, the innovative coding system *m600* was presented to an international public in cooperation with Hewlett-Packard and was much acclaimed. In 2007, the company presented the model for starters *m600 basic* and the multi-talent *m600 advanced*, thus commencing a new generation of coding equipment.
