SYSTECH International Engages Domino Printing Sciences plc To Deliver Full Track And Trace Capability For Pharmaceutical Manufacturers

New York, New York, March 21, 2006 – SYSTECH International, the leading provider of Packaging Performance Management solutions and Domino Printing Sciences plc, the world-leader in ink jet and laser technologies, today announced an agreement that will combine SYSTECH's TIPS Serialized Product Tracking solution with Domino's marking and coding solutions. As a SYSTECH International Authorized Solutions Provider, Domino will provide pharmaceutical manufacturers with a comprehensive end-to-end solution to combat counterfeit product and increase patient safety.

“The partnership is a natural fit for both Domino and SYSTECH,” said Robert DeJean, president and CEO of SYSTECH International. “The agreement leverages Domino's expertise in coding and marking technologies with our track and trace technologies to deliver an integrated solution that enables pharmaceutical manufacturers to authenticate product across their supply chains.”

Various coding formats are supported, ranging from bar code and data matrix to RFID. The addition of in-line verification and tag reading capabilities, coupled with failsafe data and product tracking control ensures that customers are presented with secure systems representing the best technologies available for application at the point of manufacture.

“Combining SYSTECH’s TIPS Serialized Product Tracking solution with Domino’s core marking and integration capabilities provides customers with quality solutions that can be delivered on a global scale,” said Simon King, director of Domino’s Integrated Solution Group. “The comprehensive solution will allow pharmaceutical manufacturers to significantly increase patient safety and combat counterfeit and diversion challenges.”

Both companies have deep experience within the pharmaceutical industry, providing solutions that are fully compliant with the requirements for 21 CFR Part 11 and further supported with GAMP validation packages.

About SYSTECH International

SYSTECH International is the leading provider of Packaging Performance Management solutions for manufacturing operations. Founded in 1985, its TIPS® family of solutions was developed specifically to meet the needs of inspection, control, and information management in packaging environments. A recognized market leader in highly regulated industries such as Pharmaceutical, Medical Device, Biotechnology, and Healthcare, the company also services other packaging and converting industries.
