**SYSTECH International's TIPS Serialized Product Tracking Solution Achieves  
Certified Integration with SAP® Auto-ID Infrastructure**

**SYSTECH's Interface Software Fully 21 CFR Part 11 Compliant**

**New York, New York, March 21, 2006** – SYSTECH International, the leading provider of Packaging Performance Management solutions for manufacturing operations, today announced that its TIPS Serialized Product Tracking 7.0 solution has achieved SAP certification for integration with the SAP® Auto-ID Infrastructure component of the SAP NetWeaver® platform, which powers many SAP solutions for RFID. The software is one of the first fully 21 CFR Part 11-compliant solutions to earn this designation.

Currently piloted by several pharmaceutical manufacturers in the United States and Europe, TIPS Serialized Product Tracking supplies mass serialization of products at the item, case and pallet level to facilitate e-Pedigree, authentication, and track and trace. This serialization, using Electronic Product Codes (EPCs) on RFID enabled labels and bar code, is done on the packaging line and is integrated with existing packaging operations.

“For customers, this certification helps guarantee the seamless integration between our TIPS Serialized Product Tracking’s comprehensive and reliable packaging line device management, data collection, and 21 CFR Part 11 compliance and the SAP Auto-ID Infrastructure,” said Robert DeJean, SYSTECH’s President and CEO. “This combination can help pharmaceutical manufacturers ensure product integrity across their supply chain.”

TIPS Serialized Product Tracking is part of SYSTECH's comprehensive suite of machine vision inspection, packaging line automation and information management solutions.

SAP provides a rich set of integration technologies that enable third-party vendors to integrate their software with SAP solutions seamlessly for more customer satisfaction. SAP's RFID certification process helps ensure that customers deploying the SYSTECH solution can seamlessly integrate TIPS Serialized Product Tracking software with the SAP Auto-ID Infrastructure. SYSTECH has worked closely with SAP Labs throughout the testing and certification process. Testing was successfully completed for all business processes within the SAP Auto-ID Infrastructure.

### **About SYSTECH International**

SYSTECH International is the leading provider of Packaging Performance Management solutions for manufacturing operations. Founded in 1985, its TIPS® family of solutions was developed specifically to meet the needs of inspection, control, and information management in packaging environments. A recognized market leader in highly regulated industries such as Pharmaceutical, Medical Device, Biotechnology, and Healthcare, the company also services other packaging and converting industries.
