SYSTECH International Launches TIPS Serialized Product Tracking

Solution Enables Complete Mass Serialization And Track And Trace Of Item-Level Products

Cranbury, New Jersey, October 19, 2005 – SYSTECH International, the leading provider of Packaging Performance Management solutions for manufacturing operations, today announced the introduction of its TIPS Serialized Product Tracking solution. Designed to combat counterfeit and diverted product challenges, the solution works in concert with RFID and bar code technologies.

“Several key customers in both the pharmaceutical and healthcare sectors have engaged us to provide solutions to improve product authentication capabilities across their supply chains,” said SYSTECH’s CEO Robert DeJean. “Utilizing TIPS Serialized Product Tracking they can better respond to the counterfeit and diverted product challenge and ultimately improve financial, brand, and public perception issues around this epidemic.”

“We have seen tremendous interest in the TIPS Serialized Product Tracking solution,” added Joe Costa, SYSTECH’s Director of Marketing. “We will continue to focus on educating organizations on the value that this technology can bring to their bottom line.”

TIPS Serialized Product Tracking is part of SYSTECH’s comprehensive suite of machine vision inspection, packaging line automation and information management solutions.

About SYSTECH International

SYSTECH International is the leading provider of Packaging Performance Management solutions for manufacturing operations. Founded in 1985, its TIPS® family of solutions was developed specifically to meet the needs of inspection, control, and information management in packaging environments. A recognized market leader in the Pharmaceutical, Medical Device, Biotechnology, and Healthcare industries, SYSTECH is rapidly gaining market leadership in the Food and Beverage industry. While focused on highly regulated industries, the company also services other packaging and converting industries including Printing, Cosmetics, Consumer Products, Automotive, and Electronics.
