## **SYSTECH International Expands Worldwide Headquarters**

### **New Facility Extends Training and Demonstration Capabilities**

**Cranbury, New Jersey, June 9, 2005** – SYSTECH International, the leading provider of Packaging Performance Management solutions for manufacturing operations, has moved into a new worldwide headquarters in Cranbury, New Jersey. The new facility, twice the size of the previous building, expands training, demonstration, development, and warehouse space to support its growing customer base.

Speaking of their new facility, SYSTECH's CEO Robert DeJean stated, "Our new worldwide headquarters allows us to better service our customers and business partners. The enhanced Training Center is equipped with SYSTECH's state-of-the-art machine vision inspection and packaging line automation systems and was specifically designed as an intimate, hands-on learning environment. This ensures that all students receive personalized support to rapidly become more proficient with our solutions."

"A new Demo Center offers visitors a hands-on opportunity to see real world displays that highlight the broad range of applications provided by our packaging performance management solutions," noted Joseph Ringwood, Vice President of Sales. "Applications currently being showcased include bar code reading and grading; lot and date code verification; and product presence, shape, color, count, and defect detection."

In addition to the new worldwide headquarters in Cranbury, SYSTECH International has European Headquarters in Hull, U.K. and numerous regional offices across the globe.

### **About SYSTECH International**

SYSTECH International is the leading provider of Packaging Performance Management solutions for manufacturing operations. Founded in 1985, its TIPS® family of solutions

was developed specifically to meet the needs of inspection, control, and information management in packaging environments. A recognized market leader in the Pharmaceutical, Medical Device, Biotechnology, and Healthcare industries, SYSTECH is rapidly gaining market leadership in the Food and Beverage industry. While focused on highly regulated industries, the company also services other packaging and converting industries including Printing, Cosmetics, Consumer Products, Automotive, and Electronics.
